

- ✓ - Write up a Problem Statement *Secure Parcel in New Zealand*
- ✓ - Identify Criteria (ie – durable, weather proof etc) and Constraints (max retail price , max size etc)
 - Research existing solutions to the problem
 - Develop some (minimum 2) solutions to the problem - sketches etc must be done...
 - Use a decision matrix to determine the best option
 - If possible supply a cardboard, 3D printed etc scale or full size prototype
 - Write a conclusion on what you have learned, possible improvements to your design and whether you believe this would be a feasible product
