

# Second Assignment.

## 2.3 Reader Response to Part 2: The Conscientious Omnivores

Consider the Part 2 of *The Ethics of What We Eat* by Singer and Mason, and write at least 3 paragraphs where you accomplish the following:

- **Summarize** what you read, **incorporating a quote and/or paraphrase, with proper citation**, and **define a context** for what you read.
- **Make connections** between what you read, and other knowledge/experience/observations you have.
- **Articulate any questions/curiosities/predictions/challenges** you have based on the reading, and **use evidence** to explain those.

The Reader Response will be graded by a simple rubric you can see here, and must be done by the time we review the piece in class. Consider how you might use the Reader Responses to advance your work on the papers we're working on.

This is in a Discussion forum, and other can respond to what you write, but having the exchange of ideas in here is not required.

Please reading book first. Do not copy anywhere and Do not read just only summarize. **You have to read all of each part and then do work assignments PLEASE.**
